

Inomjon Toshmirzayev

Backend Developer

toshmirzayev-inomjon.online | Kitob / Shahrisabz, Uzbekistan | github.com/Toshmirzayev-Inomjon

PROFILE

I build reliable backend systems, REST APIs, admin dashboards and business platforms using Python, FastAPI, Django, Node.js and PostgreSQL. My focus is clean architecture, secure data flows, performance and production-ready delivery.

CORE SKILLS

Python, FastAPI, Django, Node.js, PostgreSQL, Prisma, REST API, authentication, admin dashboards, Git, deployment and system integration.

EXPERIENCE

Backend Developer - Independent Web Projects

2024 - Present

Building APIs, admin dashboards and business platforms with reliable database architecture and production deployment.

Next.js Developer - Web Applications and Platforms

2022 - 2024

Implemented API routes, authentication flows, admin panels and database-backed application features.

Automation Developer - Client Web Platform

2021 - 2022

Created workflow automations, integrations, bots and practical web solutions for business processes.

SELECTED PROJECTS

Admin Dashboard

A secure dashboard for managing profile content, projects, tags and portfolio metrics from one panel.

Stack: Next.js, Node.js, Prisma, SQLite

Business Backend Platform

A backend system for digitizing business workflows, customer requests and internal operations.

Stack: Python, FastAPI, PostgreSQL, REST API
